**Allen Wrench  
4 mm**

HDW-03-10167

**Outer Hoop**

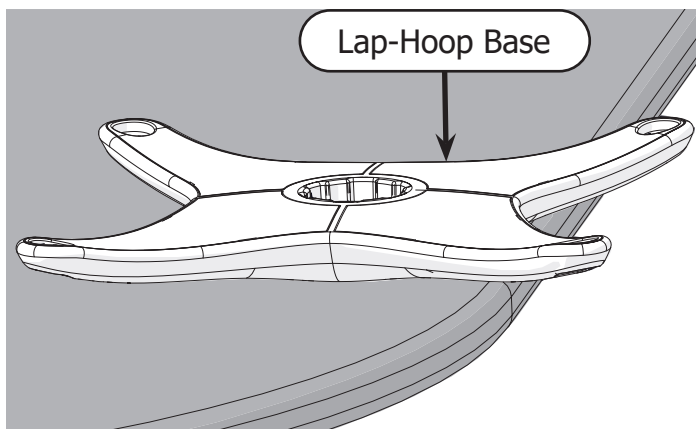

GCF-09-14125

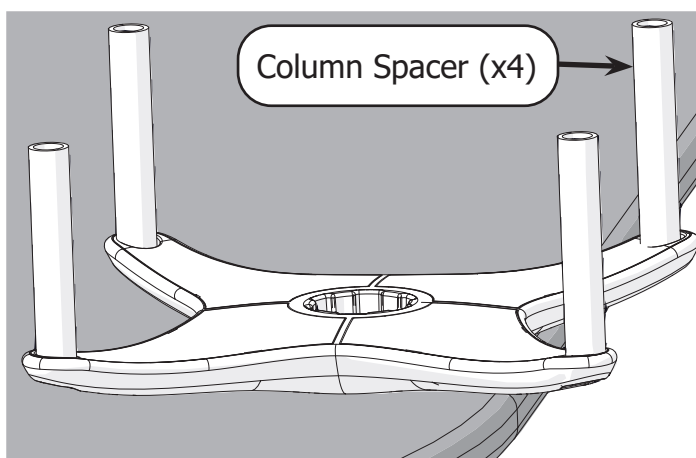

# Assembling the Lap-Hoop

**If purchased with the Lap-Hoop Stand accessory, please refer to the instructions in the stand kit for assembly.**

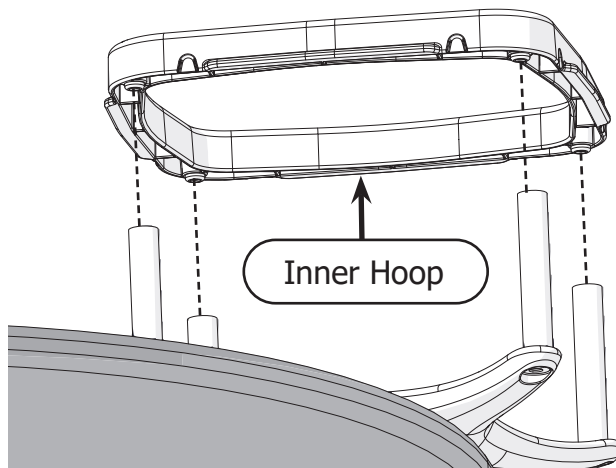

- 1 Place the **lap-hoop base** down on the edge of a flat surface so the base is curving up.

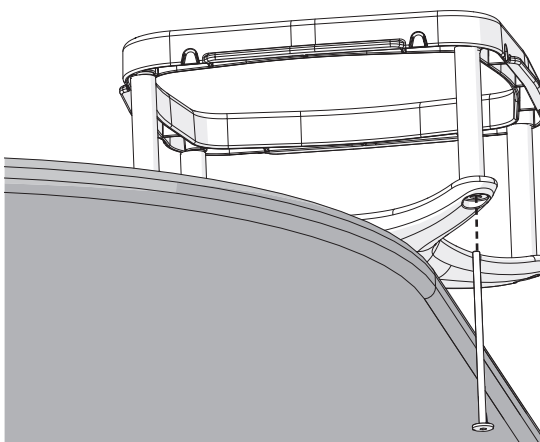

- 2 Insert a **column spacer** into each of the lap-hoop slots.

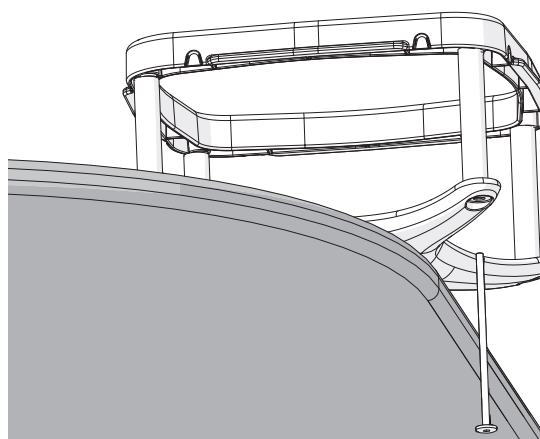

- 3 Align the screw holes and carefully balance the **inner hoop** on the column spacers.

- 4 Screw a spacer bolt through the base, spacer column, and into the inner hoop using the 4 mm Allen wrench.

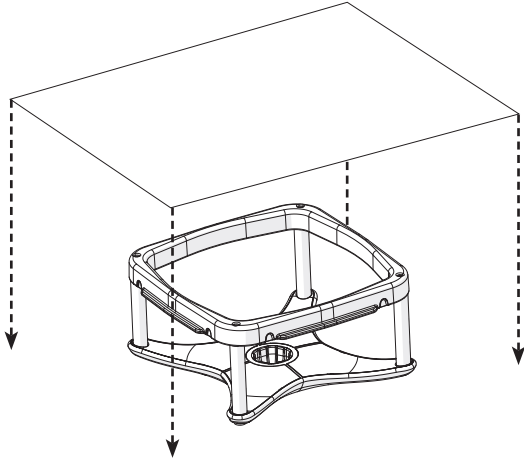

- 5 Rotate the lap-hoop and repeat steps four and five with the remaining spacer bolts.

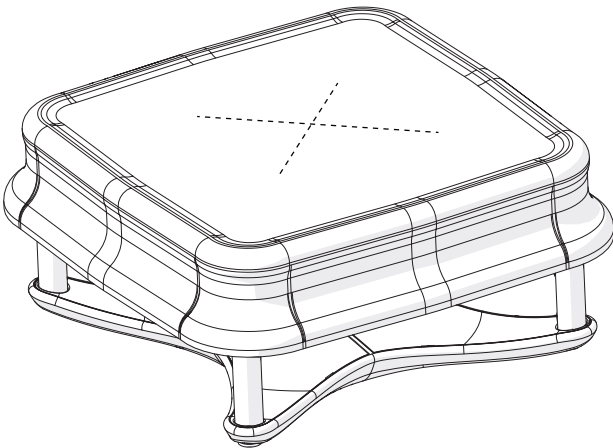

# Loading the Fabric

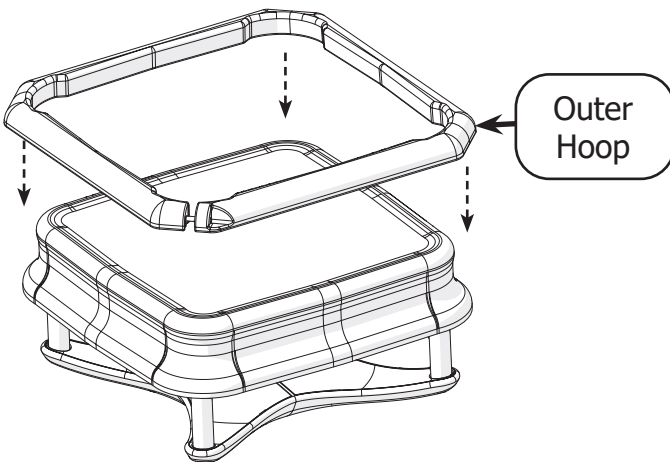

- 1 Lay the quilt over the lap-hoop.

- 2 Position the fabric so the area you wish to stitch onto is inside the hoop.

- 3 Keep the fabric smooth and slide the **outer hoop** down onto the lap-hoop.

- 4 Turn the corner screw to loosen or tighten the outer hoop.
